Task Name	Estimated Time (Hours)	Actual Time (Hours)	Notes
Refresh Git	1.5	1	
Research Wamp and Components	3	4	Very powerful tool, I was amazed how simple they made the setup of a database through phpmyadmin.
Setup Database	3	4	I used relational database, this was great practice since my last database class was at Macomb Community College a few years ago.
Setup Front End Php	6	10	I learned a lot about php, I did not know you can seemlessly use javascript, php, and HTML.
Test	3	3	
Documentation	10	5	

Issues
I've only really used BitBucket just a bit of a learning curve getting use to github.
I just got snagged on the different types of databases you can have. Later I discovered I needed my tables to be setup as Inno
I have never used most of the technologies, a lot of research and testing had to go into making this part work as intented.
Unfortuanly I have never done most of these diagrams.
